'together reinventing our legacy' CARTOON depicts the 192 countries participating in COP15 (UN Conference on Climate Change, Copenhagen, Dec 2009) creating positive solutions.

In this piece, the flag poles at the UN buildings have no flags. The flags have come together - collectively reinvented as solar panels. Solar power in fact offers an enormous opportunity for achieving greater independence and security while reducing the harmful effects of climate change.

'Time For Action' CARTOON, inspired by Ole Jorgen Hammeken of cool(E)motion, is intended to inspire as many people as possible to pay attention to developments at the UN Climate Change Conference 2009 and to take climate action.
